PROFILE

Computer Science Engineering graduate with a strong foundation in Software Development, Data Structures & Algorithms, DBMS, and Object-Oriented Programming.Skilled in Python, Java, SQL, RESTful APIs, and full-stack application development with experience building scalable web, mobile, and IoT-based applications. Passionate about writing clean,maintainable code and continuously learning modern software engineering.

TECHNICAL SKILLS

- Programming Languages**:** Python, Java, JavaScript, Dart
- Frameworks & Technologies**:** React.js, Next.js, Django, Flutter, RESTful APIs, Docker
- Databases**:** SQL, MySQL, SQLite
- Tools**:** Git, GitHub, Claude Code, GitHub Copilot, VS Code, Power BI, Antigravity, Excel, Vercel
- Core Competencies**:** OOP, Data Structures & Algorithms, DBMS, Debugging, Software Testing, Data Analysis, Software Development, Design Patterns

EXPERIENCE

Full Stack Developer Intern | Bairuha Tech | Present

- Develop pages for the official HLB HAMT website including Podcast, About HLB, Publications, Awards &Recognition, HLB Global, CSR and Leadership.
- Developed key HLB HAMT website pages using Next.js, React, TypeScript and Tailwind CSS.
- Implemented animations and supported Docker deployment using Git and Claude Code.

Data Analyst Intern | CodeMe Hub International Pvt. Ltd. | Jun 2025 – Jul 2025

- Processed and analyzed datasets using Python (Pandas, NumPy) and Excel, including data cleaning and transformation.
- Developed Power BI dashboards to visualize data and generate insights.
- Used Excel functions, including VLOOKUP and PivotTables, to organize, summarize, and analyze datasets.

PROJECTS

FinTrack Pro – Personal Finance Dashboard | React.js, TypeScript, Recharts

- Developed a responsive personal finance dashboard using React.js and TypeScript, with reusable components for managing financial transactions.
- Implemented CRUD operations, search, filtering, data persistence, and CSV export for efficient transaction management.

NSS Connect (Web Application) (Django, Python, HTML, CSS, SQLite)

- Developed a web application featuring authentication, event registration, data management, and an admin dashboard.
- Implemented database operations and integrated frontend components with backend workflows.

Bio-Cyber Hybrid Neuromorphic Chemical Sensor (Flutter, Python, ESP32, IoT)

- Developed a Flutter application for real-time gas monitoring, sensor visualization, and user alerts.
- Integrated ESP32-based communication and RESTful APIs performed testing and debugging.

EDUCATION

- Bachelor of Technology in Computer Science and Engineering
- AWH Engineering College, Kozhikode | 2022 – 2026
- Higher Secondary Education
- W.O.H.S.S, Pinangode | 2020 – 2022
- Secondary School Education
- W.O.H.S.S, Pinangode | 2019 –2020

CERTIFICATIONS AND ACHIEVEMENTS

- Boot Camp on “Allied Technologies for UAS/Drone” – NIELIT Calicut (2025)

PERSONAL SKILLS

- Problem Solving
- Analytical Thinking
- Continuous Learning
- Communication and Teamwork
